Will plant almost any variety of seeds except very large seeds, such as Corn, Beans and large seeded Peas. Can be used for Sweet Peas and Beets if the extra Arbor is used. A small brush regulates the feed.

No. 1. One rowed Seeder holds about 4 ozs. of Radish Seeds. Handle can be moved in any direction. Price, \$4.00.

Pricking Rake, to be used in connection with No. 4, as the space between the teeth is the same as on the seeder. One end of the Rake can be used for loosening the soil between the rows, and the other end can be used as a cultivator or can be inserted in the ground and pulled underneath the plants, cutting all the long tape roots over, instead of transplanting. Price, \$1.00.

We do not furnish the wooden handles for any of these machines.

# Danish Seed Import SEED ANNUAL *for 1929*

---

**I**N presenting this, our fifteenth annual Seed List, we wish to express our thanks to all our customers for the confidence and patronage we have received, and we trust you will continue to send your orders this way. We aim to have only the very best and most reliable seeds which it is possible to get, and we import a large part of our seeds from the best growers in Denmark and other European countries. We realize that a Gardener or Florist cannot be too careful in the selection of the seeds he is using and therefore we are very cautious in getting the seeds from the best sources we know of.

We do not treat any seeds unless asked for as such seeds are not allowed to be sent by parcel post, but we recommend the buying of either Semesan or Uspulun and treat the seeds on your own premises before seeding.

Any orders you may send us will receive our most careful attention.

Respectfully yours,  
**DANISH SEED IMPORT,**

*Chris Mosberg.*
